Re: Interim Minor Source Modification Approval
I-067-16594-00065

Dear Mr. Moore:

On December 18, 2002, the Office of Air Quality (OAQ) received an interim minor source modification petition from Daimler Chrysler Corp. 1001 East Boulevard, Kokomo, Indiana 46904. Based on the data and information submitted in the interim petition and the provisions in 326 IAC 2-13-1, this interim to construct is hereby approved for: one diesel fueled emergency generator.

Pursuant to a US EPA memo dated September 6, 1995, potential to emit (PTE) of emergency generators can be determined on a limited 500 hours per year of operation. Based on these limited hours of operation, the limited PTE of the emergency generator being proposed is considered a minor source modification and at the same time makes the 326 IAC 2-2 Prevention of Significant deterioration (PSD) requirements not applicable. A copy of the interim petition was provided by the applicant in the Howard County Public Library for public review.

Detailed conditions to limit the hours of operations will be specified in the final minor source modification 067-16594-00065. This interim minor source modification expires on the effective date of the final minor source modification. This interim minor source modification may be revoked after its effective date upon a written finding by the OAQ that any of the reasons for denial in 326 IAC 2-13-1(h) exist or if the final minor source modification is denied. The facilities subject to this approval may not operate until the final minor source modification is issued by OAQ.

Sincerely,
